EDUCATION

Singapore University of Technology and Design
B. Eng, ISTD Pillar
May 2016 to Sep 2019
CGPA: 4.77/5.0 (summa cum laude)
• SUTD Distinguished Undergraduate Scholarship - 2 in total cohort
• SUTD Honours List (Dean's List Equivalent) - A.Y. 2016/2017, 2017/2018, 2018/2019
• Singapore Computer Systems Excellence Award

Massachusetts Institute of Technology
SUTD-MIT Global Leadership Program, Jun 2017 to Aug 2017
• 12 selected from 440 students for MIT summer exchange program

NUS High School of Math and Science
NUS High Diploma
(High Distinction)
Jan 2008 to Dec 2013
• Honours in Physics, Biology, Chemistry | Major in Mathematics
• Score of "5" for Advanced Placement Exams in Physics B, Physics C, Biology, Chemistry, Calculus AB, Statistics

SKILLS

Programming Languages
Python • C • JavaScript • TypeScript

Familiar Technologies
Linux • Kubernetes • Ethereum • PostgreSQL
Node.js • vue.js • React • d3.js
• Docker • LaTeX

Data Science
Jupyter • sklearn • numpy
pandas • matplotlib • Tensorflow • PyTorch

Finance
Bloomberg (Terminal and Excel/Python APIs) • Options Pricing • Portfolio Risk Analysis

WORK EXPERIENCE

Software Developer | Squarepoint Capital
Jun 2020 - Current, Full-time
- Designed and built a full-stack Universe Management microservice for management of internal data catalogs using Kubernetes and FastAPI to automate and streamline rote tasks across different teams
- Contributed to internal timeseries data ingestion infrastructure, improving user experience, data ingestion speed, and load distribution.
- Built data pipelines for 50+ Timeseries datasets along with the relevant scheduling and verification processes, integrating into quant-accessible internal service
- Consistently rated among top performers in the Data Engineering team

Quantitative Developer | Novalux Investment Management
Dec 2018 - Feb 2020, Internship & Full-time
- Designed and implemented data pipeline with numerous data sources for purposes of backtesting, portfolio monitoring, and report generation
- Built internal portfolio management system from the ground-up, with UIs for non-technical users' input of trades and relevant metadata
- Sped up various internal tools by 80% by parallelizing daily processes while maintaining thread-safety with regards to database accesses

Software Developer | traceto.io
May 2018 - Aug 2018, Summer Internship
- Created Ethereum address analysis platform for analyses of arbitrary Ethereum addresses, for transaction and activity monitoring purposes
- Built using Python/JavaScript and MaterializeCSS; data sourced via public APIs (e.g. Ethereum JSON RPC and Etherscan) and stored locally in PostgreSQL database

SELECT ACHIEVEMENTS AND PROJECTS

SUTD 50.021 Artificial Intelligence | Best Project
Jun 2019 - Sep 2019, OpenAI Gym: Car Racing
- Developed unique imitation learning approach that achieved generalized state-of-the-art training score with 90% reduction of training time
- CNN-based model analyzed using Layer-wise Relevance Propagation to visualize spatially significant input regions on a frame-by-frame basis

Project Jessica | Outstanding Contribution to Pillar
Nov 2018 - Feb 2019, Robotics
- Robotics Open House showcase for SUTD; Used 6-axis robotic arm to interface between end-users and an automated coffee machine
- Interfaced with the Robot Operating System (ROS) stack for motor control, and built a Flask web-application for operator convenience of functionality
- Implemented I/O for overall systems control: Coffee capsule detection, machine activation, etc. via serial communications with an Arduino UNO.
